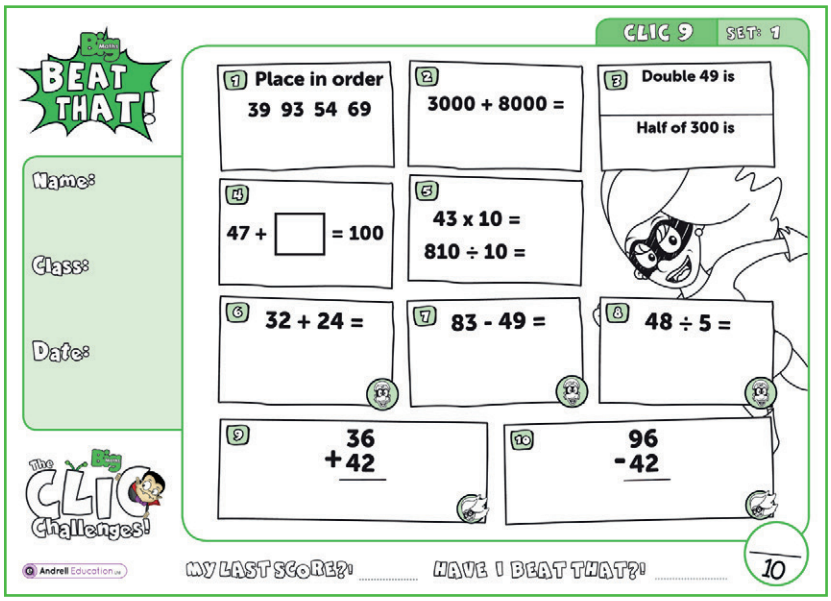
A Guide for Home Learning

CLIC 9

Introduction - CLIC 9

In school, each week, children complete a CLIC challenge. The answers that they provide tell their teacher what skils they understand and allow teachers to focus on teaching the skills that they don't (as well as new skills that will be taught). If your child completes their challenges online at school, you may have been sent a link to log on at home. This pupil log on only allows children to complete one challenge a week. We are currently building a new pupil area, which will help with home learning.



This guide provides you with a copy of a CLIC challenge, a description of the skill each question is challenging and some sample resources for each question to help with home learning. (A description of each of these resources is on the next page.) The key is to keep it fun, no pressure and limit the time to less than 20 minutes a day, unless your child wants to carry on!

Please seek and follow advice from your child's teacher and school!

What skill does each question challenge?

Question 1
I can understand 2d numbers

Question 2
I can add thousands

Question 3
I can double 2d numbers

Question 4
I can find the missing piece to 100

Question 5
I can multiply whole numbers by 10

Question 6
I can add a 2d number to a 2d number

Question 7
I can solve any 2d - 2d

Question 8
I can use a Tables Fact to find a division fact (with remainders) (2, 3, 4, 5x tables)

Question 9
I can solve a 2d + 2d

Question 10
I can solve a 2d - 2d

Remember To's

Every step of learning (skill) in Big Maths has 'Remember to...'s. These are simple reminders for children to 'Remember to' do this, this, etc...

In Big Maths, we have divided complicated skills into small steps, provided 'Remember to...'s and examples to keep it simple for children.

A Progress Drive is a collection of skill steps that progress a child's learning to the point of mastering the larger objective.

Repeat Sheets

Repeat sheets contain a number of questions (usually 10) that you can use for repeat practice of a particular step. Please feel free to create your own repeat questions to avoid children simply memorising the questions and answers.

Revisit Sheets

Revisit sheets contain a number of questions (usually 10) that you can use which include a unit of measure applied to the numbers (It's Nothing New!) of a particular step. Please feel free to create your own revisit questions to avoid children simply memorising the questions and answers.

Real Life Maths Sheets

Real Life Maths sheets contain a number of questions (usually 5) where the questions have been placed into worded scenarios for a particular step, increasing the complexity and challenge further. Please feel free to create your own real life maths questions to avoid children simply memorising the questions and answers.

Select Sheets

Select sheets contain a number of worded questions (usually 5) which no longer automatically relate to the step we are on. These increase the complexity and challenge further still. Please feel free to create your own select questions to avoid children
simply memorising the questions and answers.

CLIC 9

The following CLIC challenge is an example for you to use to practice at home. We have included the answer sheet as well. Please feel free to create your own additional questions by changing the numbers for any that your child gets wrong. In this pack, there is additional advice for each question, with resources that can help with home learning. It is important that you use the correct challenge level as provided by your teacher.

4 **A box of oranges weighs 23kg. There are 10 boxes. What is the total weight?**

5 **Pim has 10 jugs of water. Each jug contains 41L. How much water is there in total?**

Real Life Maths Answers

Step 1 — **Multiplying by 10**

I can multiply whole numbers by 10

Remember to:

- place a zero on the ones (units) end
- remember that this moves the digits one place to the left
- remember that this makes the number 10 times bigger

1 **Pim has 14 boxes. Each box has 10 sweets. How many sweets are there in total?**

There are 140 sweets in total.

2 **There are 37 people at a party. Each person gets 10 gifts. How many gifts are there in total?**

There are 370 gifts in total.

3 **A box of Lego costs £52. How much do 10 boxes cost?**

They cost £520.

4 **A box of oranges weighs 23kg. There are 10 boxes. What is the total weight?**

The total weight is 230kg.

5 **Pim has 10 jugs of water. Each jug contains 41L. How much water is there in total?**

There is 410L of water.
